Agenda

- What is Semantic Versioning?
- What branching strategy should I use?
- What is GitVersion?
- Why do I need GitVersion?
- What is GitReleaseManager?
- Putting it all together...

Q

What is Semantic Versioning?

A

“...simple set of rules and requirements that dictate how version numbers are assigned and incremented. These rules are based on, but not necessarily limited to, pre-existing widespread common practices in use in both closed and open-source software.
