Code

https://gep13.me/ShipItCode

#### Agenda

- What is an issue?
- What is Semantic Versioning?
- What branching strategy should I use?
- What is GitVersion?
- What is GitReleaseManager?

Q

What is an

issue?

# Demo

Q. What is an issue?

A

66 ...it is the starting point for all work undertaken in a product release.

## Q

#### What is

#### **Semantic Versioning?**

Q. What is Semantic Versioning?

A

66 ... a simple set of rules and requirements that dictate how version numbers are assigned and incremented. These rules are based on, but not necessarily limited to, pre-existing widespread common practices in use in both closed and open-source software.

#### The Rules

Given a version number MAJOR.MINOR.PATCH, increment the:

- MAJOR version when you make incompatible API changes
- MINOR version when you add functionality in a backwardscompatible manner
- PATCH version when you make backwards-compatible bug fixes

Additional labels for pre-release and build metadata are available as extensions to the MAJOR.MINOR.PATCH format.

#### **Examples**

- 0.1.0
- 0.3.13
- 1.0.0
- 0.2.0-unstable3
- 0.2.0 unstable.3+Branch.develop.Sha.e6eb071cd30974b80d7e237b85e
   7729a1d791e1e

Q

How do you know

when to bump

a version number?

#### Tools

- PublicApiGenerator
- Microsoft.CodeAnalysis.PublicApiAnalyzers

@gep13

Q. How do you know when to bump a version number?

There is no quick answer 😢

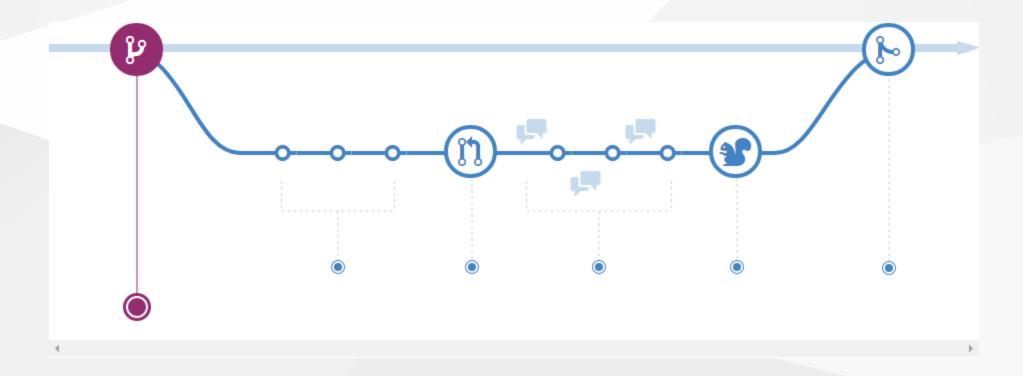

### Q

@gep13

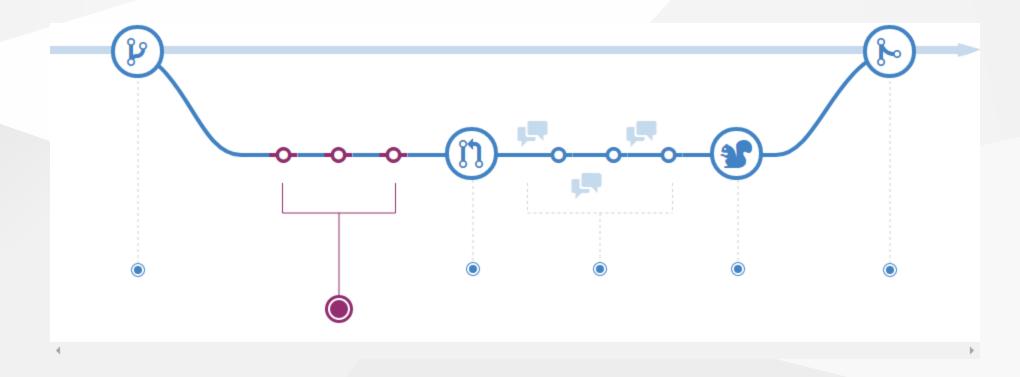

## What branching strategy should I use?

#### GitHub Flow

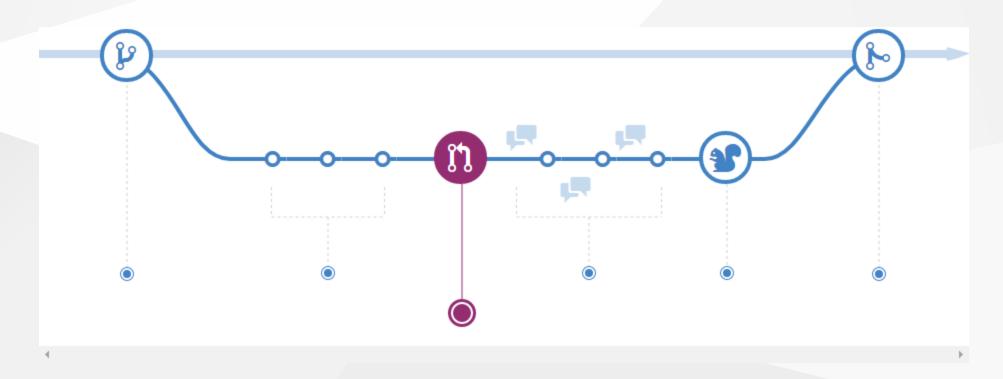

#### **Create a branch**

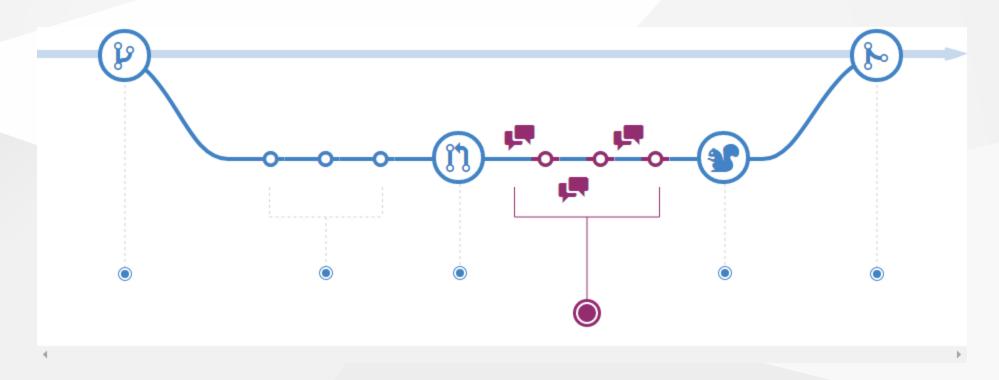

#### **Add commits**

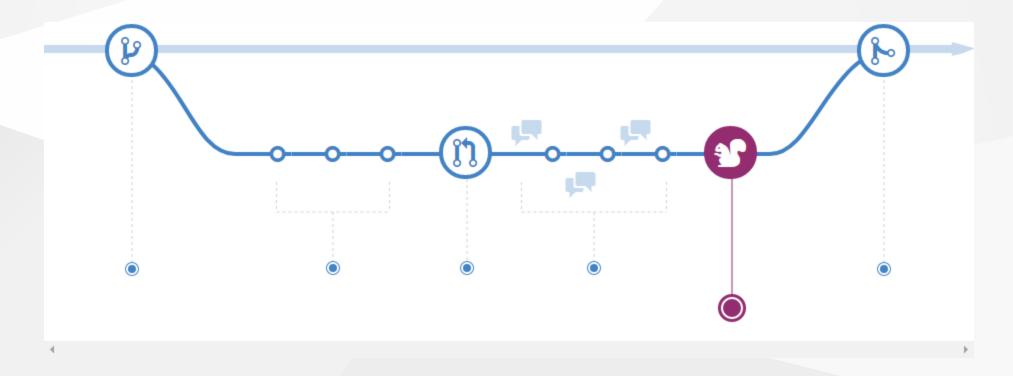

#### **Open a Pull Request**

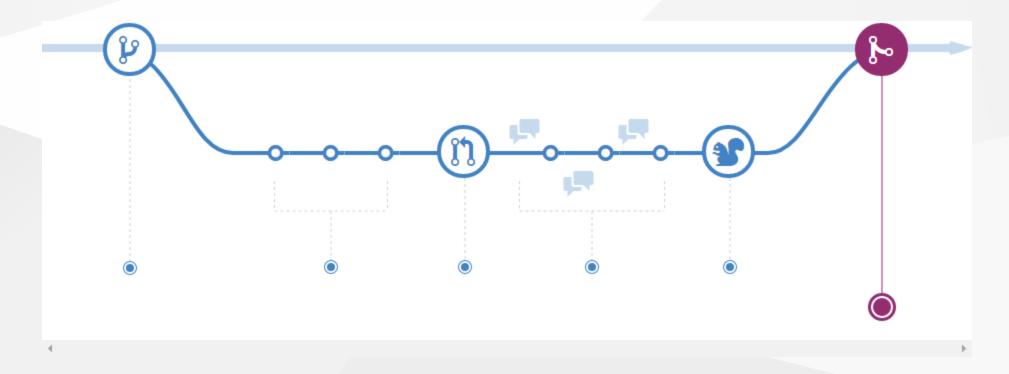

#### Discuss and review your code

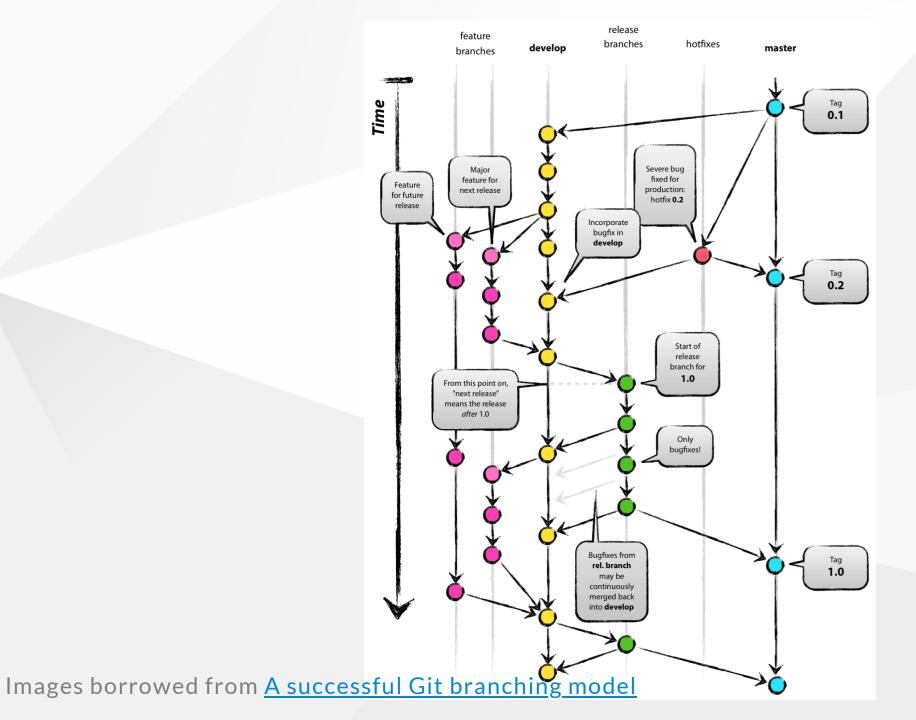

#### **Deploy**

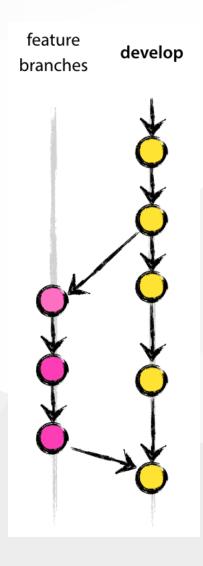

#### Merge

#### GitFlow

Q. What branching strategy should I use?

@gep13

It depends! 🦀

## Q

@gep13

### What is GitVersion?

Q. What is GitVersion?

#### 66...a tool to help you achieve Semantic Versioning on your project.

# Demo

Q

Why do I need

GitVersion?

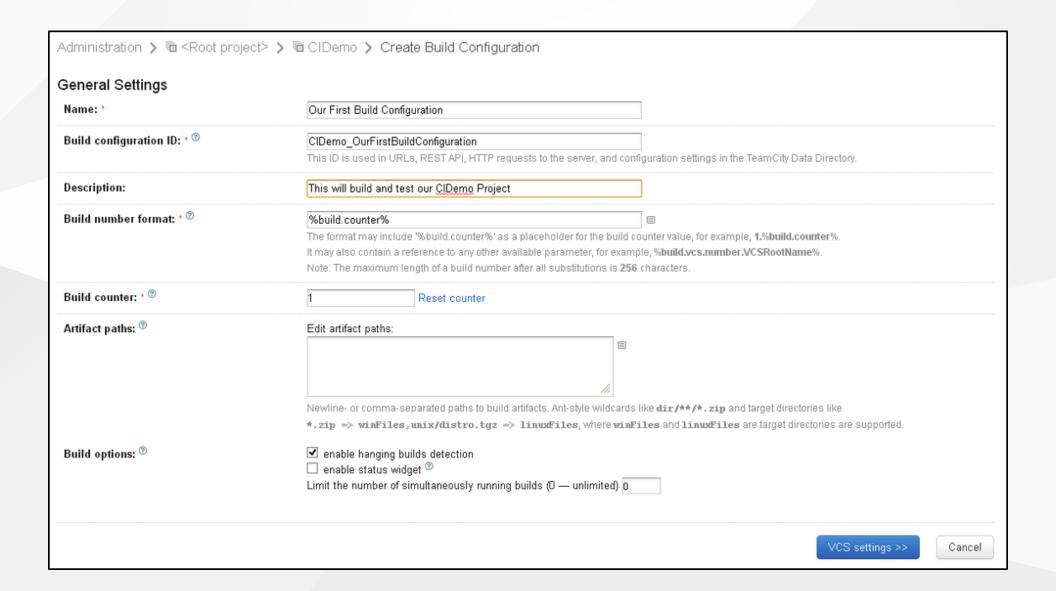

Name	Date modified	Туре	Size
📗 .git	22/06/2015 11:13	File folder

@gep13 30

```
[assembly: AssemblyTrademark("")]
[assembly: AssemblyCulture("")]
[assembly: NeutralResourcesLanguage("en-GB")]

[assembly: AssemblyVersion("0.2.0.0")]
[assembly: AssemblyFileVersion("0.2.0.0")]
[assembly: AssemblyInformationalVersion("0.2.0.0")]
```

@gep13

@gep13 32

Q. Why do I need GitVersion?

### To make version assertion reliable and consistent

## Q

#### What is

#### GitReleaseManager?

Q. What is GitReleaseManager?

66 a tool that will help create, and manage, a release for your application/product.

# Demo
